Mr. Ben Irving
County Surveyor
Roseburg, Oregon

Dear Sir:

I recently re-established the 1/4 corner for Sections 26 and 35, T20S, R 11 W.

This corner was set from the many physical features mentioned in the original field notes. The 5' high isolated rock was easy to find on the now open side hill. With this rock as a point on the line, we were able to chain out to find the foot of the hill at which the corner was set. We checked the bearing and distance mentioned to the Bay house and found the remains of the old fireplace.

While East Eslick has been changed near this corner, it is still possible to find the original stream bed. The numerous creek crossings mentioned check very closely.

We set a 1-1/2" pipe 5' long as the 1/4 corner, driving it 4 feet in the ground.

Scribed two new BTs

An 8" Maple, bears S 38° W for 96 feet

Marked 1/4 S 35 BT

A 14" Maple bears N 69° E for 76 feet

Marked 1/4 S 26 BT

The 1/4 corner pipe is now 15 feet West of the foot of the hill and 8 feet east of the new channel of E. fork of Eslick Creek.

Yours truly,

CLAUDE KERR
