

ARTHUR BOYER
ROSEBURG, OREGON

Pacific Bldg; Nov. 27, 1959

County Surveyor,
Roseburg, Ore.

Following are notes of renewed quarter section corner between Secs. 28 and 33, T.26 S; R. 1 W; Wil. Mer. in the Umpqua Nat. Forest.

Found marked stump of original B.T. which is shown in orig. govt. notes as being a 20" Fir, S.12°W. 22 lks. or 14.5 ft from the quarter corner. This stump is still in good shape and is now 38" in diameter. Measured the corner from where the face of the blaze would be if the tree were a 20" tree and at N.12°E. 14.5 ft. from this stump, set a one and one-half inch iron pipe, 40" long leaving it about 12" out of the ground with rocks piled around it. This stump will be in good evidence for a long time for renewing the corner or finding this pipe. Blazed and scribed a 11" yew tree S.26°W. 23 ft. and marked it 1/4 S. 33, T.26 S; R.1 W. 1581. B.T. ALSO; Blazed, (on one long blaze) a 30" Fir and scribed it 1/4 S. 28, T. 26 S; R.1 W; 1581 B.T. It is, msured on slope, N.40°E. 266.5 ft. from the corner or 255.3 ft. measured on a horiz. or level msmt. This tree is below a road and on a slope averaging abt. 23°, it is on the south edge of a cutting; close trees were not available. The corner is hard to locate although there is little brush there now, it is on a sidehill which faces N. and is about 40. ft. S. of a road and abt. 15 ft. above the road, vertically. The yew tree mentioned is easy to find, it is alone on the sidehill. The corner pipe and the Fir B.T. are not easy to find, nor the stump of the orig. B.T.

Witnesses;

Mr Caldwell of the U.S. Forest Service
Joe Forrest " Pac. Plywood
