

M 86-56

SURVEY NARRATIVE TO COMPLY WITH PARAGRAPH 209.250 O. R. S.

SURVEY FOR: Sun Studs, Inc.
P. O. Box 1127
Roseburg, OR 97470

DATE: February 16, 1981

LOCATION: Section 4, Township 22 South, Range 4 West,
Willamette Meridian, Douglas County, Oregon.

PURPOSE: To reestablish the North and West one-quarter
corners and to set the center of the section.

PROCEDURE: The BLM was surveying in this same area and
we used their recently established N. E.
section corner. Our survey of the East line
of this section was done by E. D. M. and
compared extremely close to that of the BLM's
new survey. Therefore, we did not attempt to
tie in their new East one-quarter corner,
which had not been set at that time. Our
survey was closed by looping through all
necessary existing corners and the center of
the section was then computed and set. The
West one-quarter corner was also set by single
proporinate measurement.

EQUIPMENT: This survey was executed with a Lietz 6
second Theodolite, a Lietz E.D.M., and a
300 foot steel tape.

SURVEY PRECISION: 1/6938 feet and 0°00'52" per angle. All
bearings are based on the bearings of the
South line of Section 4, Township 22 South,
Range 4 West, Willamette Meridian, as deter-
mined by the Bureau of Land Management in a
1963 survey.
