NARRATIVE: The purpose of this survey was to survey and describe a small parcel of ground to be acquired by an adjacent property owner. The basis of the found monuments are C.S. 51-74, although their sizes are not the same. In talking to adjacent owners, they stated that the monuments have always been in these locations and of this material. I assume from this, that the original surveyor probably made an error on his legend. The survey tie was calculated from Inst. No. 67-7345, which corresponds with C.S. 51-74. The survey was performed by L. Fanning, and D. Baughman, using a TIAE Wild Theodolite and steel tape. Office work was performed by G. Baughman.
