set by Baughman in 1971 see

1958

(CSD file M43-19) bears N04°W, 34.2 feet distant.

Accessories Found: (Condition and Source) Stump holes of original bearing trees found in 1958 BLM resurvey which were remains of trees destroyed in 1908 are no longer evident; the northeast stump hole can not be found under forest debris, and the southeast stump hole location has been obliterated by roadwork. The northwest and southwest bearing trees measure 31

#121 T28-4 ✓
#153 T28-3 ✓

and 21 inches in diameter respectively and are now fallen trees cut to short tipped out stumps. The stumpholes match the bearings and distances of the original bearing trees reasonably well but the nature of the uproots disallows accurate measurement. No blaze or scribe marks are visible because these trees have tipped over on their faces.

RENEWAL

Monument Set: (Procedure and Description) Because of the plumb and firm set of the brass cap monument and the reasonable fit of the above mentioned found stumpholes, the monument position is accepted as good.

New Accessories: (Description) A 9 inch DBH White Fir bears S09°W, 64¹/₂ feet distant and is scribed T28S R4W S25CSBT on a double blaze. A 10 inch DBH Douglas fir bears S39°W, 70¹/₂ feet distant and is scribed T28S R4W S25CSBT on a double blaze. Because of future logging in area no other suitable trees are available. Lower blazes of new BT's are carefully aimed at corner. New BT's are tagged with
