SURVEY NARRATIVE
COMSTOCK-ANLAUF SECTION
PACIFIC HIGHWAY
DOUGLAS COUNTY

FILED
RECEIVED *JR*
FEB 28 1985
COUNTY FILING
SURVEYOR
DOUGLAS COUNTY, ORE.

Map Reference - Drawing No. 7B-8-3

The purpose of the survey was to establish a new centerline for reconstruction of the Pacific Highway through the subject section. In connection with this survey, additional highway right-of-way was established and the highway centerline was referenced and monumented.

The original survey for this new section was a 1951 survey done by the Oregon State Highway Division. A resurvey was done in 1975 by the OSHD and was tied into the 1967 survey for Martin Creek-Comstock Section.

Bearings, Coordinates and distances for ground control were established from ties made by occupying Wards 2 (USC&GS) triangulation station and turning angles from Wards 2 Azimuth Mark and Spencer (1903).

The 1975 survey was then later monumented after construction of this highway portion and monumentation was completed in 1982.

An intermediate filing covering centerline monumentation set on the project has been previously submitted (see Map 7B-8-3).

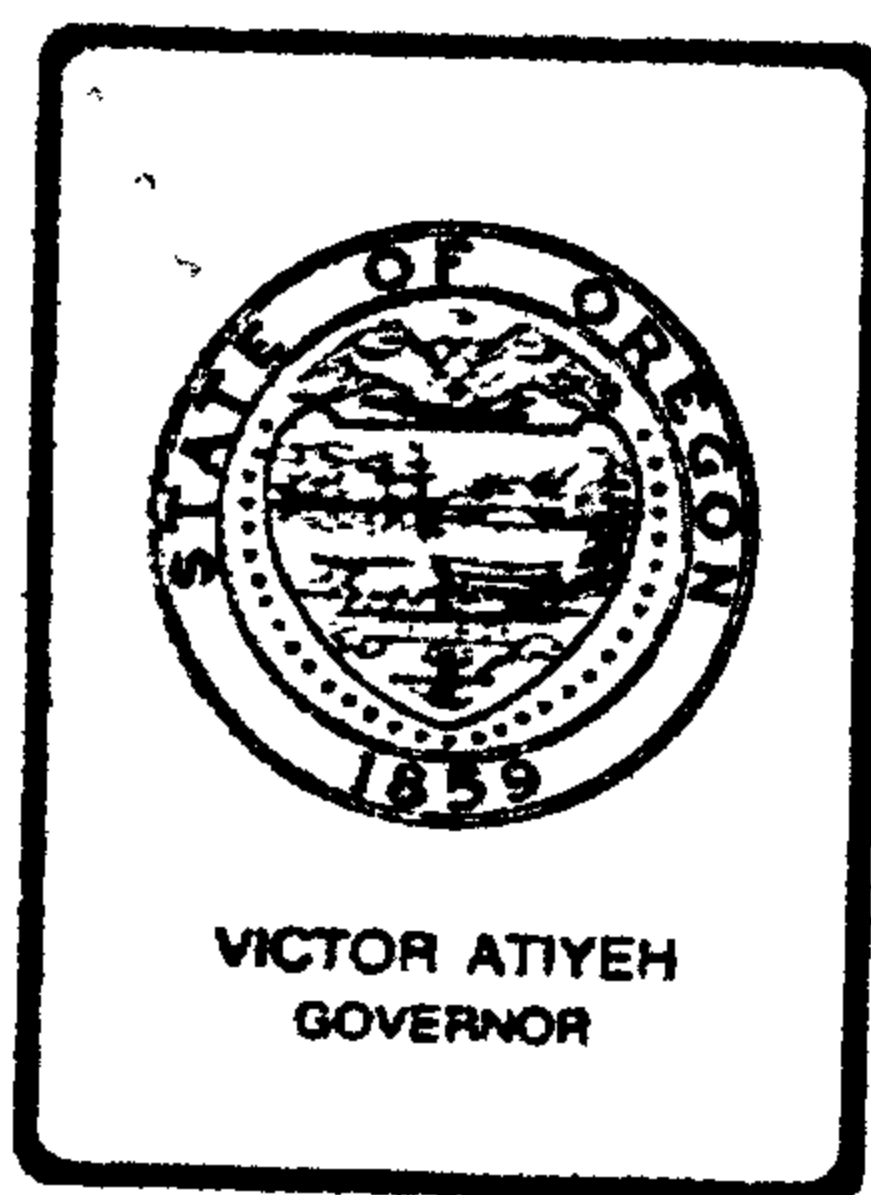

Due to the map being an update of older mapping and surveys, some shown monumentation does not have ties. This is in agreement with an understanding between OSHD and the county surveyors made in 1978.

This survey was conducted in Sections 19, 20, 29, 30 and 31, T. 21 S, R. 4 W, W.M.

Highway Umpqua

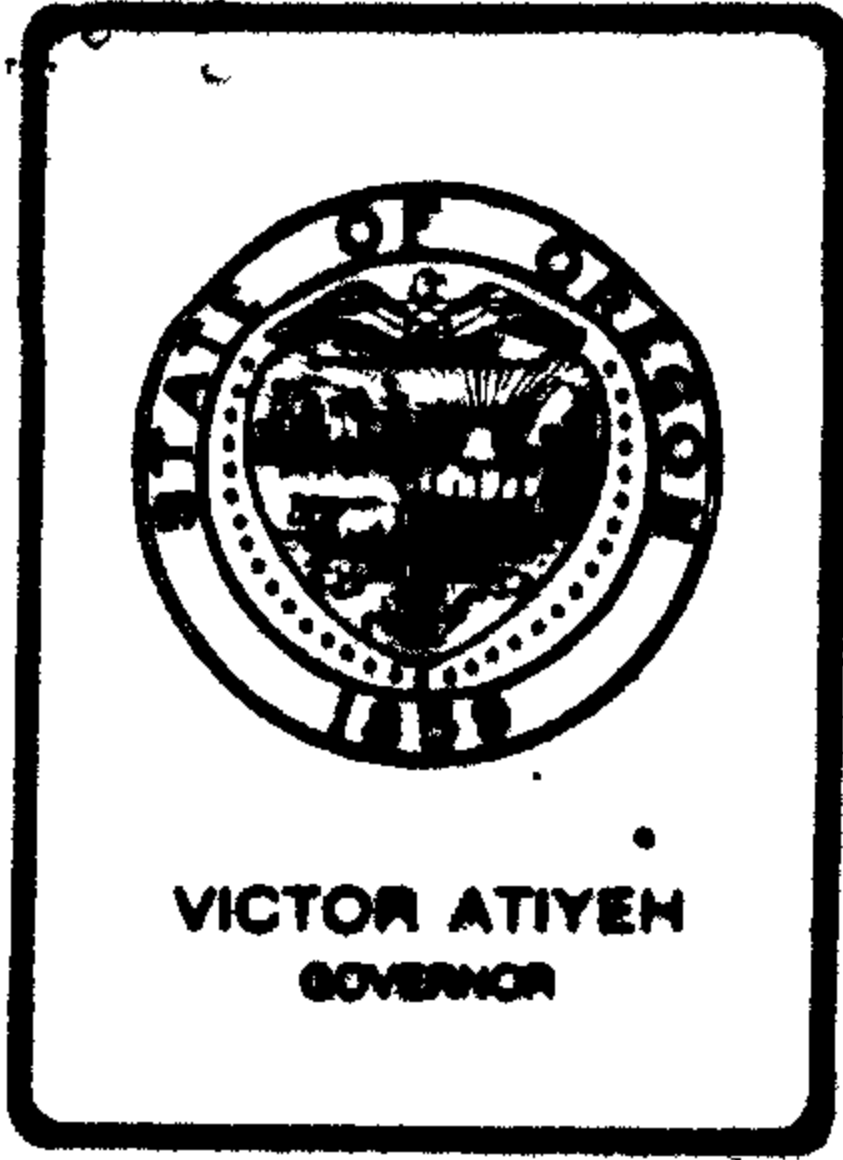

Under separate cover we are submitting a reproducible map covering the above survey for filing in your records.

This map submittal is a result of O.R.S. 209.250 and is intended to cover the state's requirements as outlined in the statute.

To save duplication of public records, the field notes for the new monumentation and the original map are on file in Salem. The location field notes are on file in the region office in Roseburg. Any further information regarding the survey may be obtained by contacting the appropriate office.
