

NARRATIVE

The purpose of this survey is the remonumentation of the NNE corner of the tract of land surveyed April 25, 1983 per C.S. File 58/285, Map File 90-44, Douglas County Surveyor's Office.

I was commissioned by Timberline Contractors, Inc. to do the construction staking on the City of Drain Community Building-Library site.

I began June 19, 1984 and tied by survey the three corners shown hereon for the basis of the horizontal control for construction staking. A Ziess Th43 with top mounted MAC II H EDM. calibrated to the Eugene Caswell Base was used.

On the morning of October 5, 1984 I returned to the site and remonumented the corner as indicated hereon per the request of Timberline Contractors, Inc.

They had accidentally destroyed the corner in the course of construction work.
