COUNTY SURVEYOR'S RECORD, DOUGLAS COUNTY, OREGON

Survey No. *Made on* June 13--1 1917	*Survey No.* *Made on*
In Town. 28 S. *Range* 7 W. *Sec.* 14,15,22,23	*In Town.* *Range* *Sec.*
Made for Lloyd Swan & Gus Pankey	*Made for*
Purpose of survey was to establish a certain line and some doubtful corners.	*Purpose of*

B F. B. 20 = 44

Began survey at corner common to sections 14,15,22 & 23 above township and range. I reest. this corner from the original witness trees. I find some discrepancies and use proportional measurements and bearings. I duly record new corner.

I then run S.89°-30' E., on a random line between secs. 14 & 23 and at

39.99 chs. I fall 0.32 chs. south of the ¼ cor. which I find from old B.Ts. I reset this cor. as recorded. I then compute the true bearing of the line to be S. 89°- 58' E. and run a true line between said sections, at

30.15 " I fell 0.08 chs. south of the S.E.Cor. of the Nathaniel Huntly D.L.C.,No. 47. I find one old B.T. here and reset this cor. as noted in the records.

I then return to the sec. cor. above noted and run a line due West by the Sun and at

10.00 " to the S.W.Cor. of the Nathaniel Huntley D.L.C.,No. 47. I make diligent seach here for old evidence and find a dogwood stump that agrees very well with the original field notes, also other surveyor signs are in evidence and I reset this cor as recorded from this due west line, and note that said corner is 0.96 chs. south of the section line between sections 15 and 22 of above township.

I then return to the corner of sec's. 15,16,21 & 22 and run the line between secs. 15 and 22. I find this very difficult line to run on account of cliffs and rough mountains and necessarily have to triangulate a good deal of this line. I start my line N. 87°-00' W. and at

15.11 " I triangulate to the cor. of sec's. 14,15, 22 & 23 and from this triangle I find that the true bearing of the line is N.84°-31' W. and the true dist. to be. 76.02 chs.

NB.-- This work was done to astablish a certain line that had long been indefinite and the utmost care was used in the work. I made sun observations whenever possible.

Messrs. Swan & Pankey expressed themselves as satisfied.

Surveyed By--F. C. Frear
Dep. Co. Sur.

Recorded by M.B.Germond.

Note Well._ The cor. common to sec's 15,16,21 & 22 was found by the use of the old B.Ts. These trees did not check very well so "balancing in" had to be resorted to in making a reest., which I did and recorded.
