The $\frac{1}{4}$ sec corner between secs 13 and 24 was identified from the stump of an original BT N 48° W 2.25 chs. This stump is about 8' high and badly rotted but the scribe marks were still visible. I set a $\frac{3}{4}$ " pipe for this corner and blazed new BT's as follows:

15" fir N 47 $\frac{1}{2}$ ° W 93.8 ft scribed $\frac{1}{4}$ S 13 CS BT
 20" " S 16° E 145.8 ft " $\frac{1}{4}$ S 24 CS BT

From this data I computed the N and S line through the center of the section and as the center point on this line is satisfactory for the center of the section to all property owners I set a pipe for the center of the section from which a fir bears S 13° W 51 ft.

The accompanying sketch illustrates the job and gives the bearing and distance s of all lines.

A solar observation was made during the course of the survey and all bearings corrected accordingly.

Field Notes filed Vault # 2 Env. # 4-9
