NARRATIVE

The purpose of this plat was to monument property corners and partition a tract land described in Volume 1104, Page 702, Douglas County Book of Deeds in compliance with Roseburg Community Development Department file No. 95-6.

Based on monuments found and shown, the westerly Right-Of-Way line of Nash St. was established by holding the 5/8 inch iron rod found on the east line of Block 72, Subdivision "A" Kinney's Improved Plat and the 3/4 inch iron pipe at the easterly corner of Lot 1, Block 2, Beulah Addition, also holding the 3/4 inch iron pipe on the north line of Lot 6, Block 2, said Beulah Addition and using record distances to a calculated point at the NE corner of Lot 4, Block 2.

The northerly Right-Of-Way of Malheur was determined by holding the centerline monumentation as shown and offsetting record distance (per Vol. 1, Pg. 44), then projecting said offset westerly and intersecting with the easterly Right-Of-Way of Lincoln St. The north line of Block 70 was calculated using record distance from the 3/4 inch pipe on Nash and the intersection point of Malheur and Lincoln.

The westerly line of the subject property was determined by using record distance from the west corner of Block 70 and record distance on the north line of that property described in instrument number 91-12289. The east line was established by holding the monuments found and shown and projecting northerly to the north line of the subject property. That property described in instrument number 94-09902 was given record distance along Nash and Malheur Streets, and parallel to both street Right-Of-Way (at record distance) to establish the west and north line of said property. The westerly line of that property described in instrument number 91-17070 was determined by holding record distance along the north line of the above mentioned 94-09902, then intersecting at a perpendicular to said north line to the north line of Block 70. Monuments were set as shown.
