### NARRATIVE:

The purpose of this survey is to subdivide the Hellenthal Property described in Instrument No. 94-12618 into 12 lots as approved under Douglas County Planning Department File No. 06-010. The property is located in the North 1/2 of Lot 16, PLAT "H", ROSEBURG HOME ORCHARD TRACTS (RHOT). In examining recorded surveys in PLAT "H", I discovered that the original RHOT lots along Stella Street were not located by proportionate measurement. Lots 17, 18 and 19 were measured at record plat distance south of the original south line of Austin Road leaving the approximate 16.5 distance deficiency between the Southwest Corner of Lot 17 and the stone monument at the Northeast Corner of Lot 26 to fall entirely in Lots 14, 15 and 16. N.E. Richardson surveyed the South 1/2 of Lot 16 in 1949 under CS 43/186 and apparently accepted an existing fence line as the South Line of Lot 16 and measured a plat record 330 feet north from the fence line to establish the North Line of the South 1/2 of Lot 16. Herman Pieske found iron rods not of record in an existing and long standing fence line under the WINGGATE SUBDIVISION plat and accepted them as the South Line of Lot 17, since they match near record distance to the original South Line of Austin Road. Under this survey, I accept the CS 43/186 monuments as locating the South 1/2 of Lot 16 and I accept the monuments found per WINGGATE SUBDIVISION as locating the North Line of Lot 16, thus leaving an approximate 320 foot north-south dimension for the North 1/2 of Lot 16. Instrument No. 94-12618 excepts the South 110 feet of the North 1/2 of lot 16, therefore, I established the South Line of ORCHARD MEADOWS 110 feet northerly of and parallel to the North Line of CS 43/186. I accept the monuments found per ROLLING HILLS ESTATES SUBDIVISION 8th ADD. as controlling the West Line of Lot 16.

A control survey was performed utilizing a static GPS Control Survey with RTK and conventional traverse loops and ties with Leica System 1200 GPS Receivers and a Leica TCRP 1203 Total Station. All survey observations were adjusted by least squares or compass rule adjustment. This survey was performed by Les Fanning, Adam DeGroot, Joel Herzberg and Tony Bellando with computations by Kris DeGroot and drafting by Bill Warren.
