NARRATIVE:

I set a spike for the Northwest corner of Section 1, Township 27 South, Range 7 West W.M., from the witness corner which is marked by a brass cap. I then measured South along the Easterly R/W line of Elgarose Road, tying in the existing fences running East, until reaching the North R/W line of Orchard Lane. There I found a fence corner. The distance measured was 3462.24 feet. Orchard Lane, having a 60 foot R/W, I added 30 feet to my overall distance, 3492.24 feet, plat record distance equaled 3483.5 feet; noting this overage of distance I searched the existing fence lines to the West and found a new fence running West on the projection of the centerline of Orchard Lane for several hundred feet. However further West I found that the new fence line had a 10 foot jog North and then a very, very old fence continued to run West. I reviewed the recorded plats of Melrose Orchards, Eden Orchards, Eden Orchards First Addition and the Town of Melrose and found that originally Orchard Lane had a R/W of only 20 feet; Re: Melrose Orchards. Therefore my total distance South from the Section corner was 3482.24 feet and checked the plat distance by 1.26 feet.

I then continued my measurements East to the unimproved road of Nob Hill, again tying in the existing fences and finding the distance between centerlines of Elgarose and Nob Hill Roads to be 1656.16 feet, plat record 1678.4. I continued North along Nob Hill Road until reaching a very old fence running West between Lots 26 and 25. My measured distance from the North R/W line of Orchard Lane was 2540.61 feet, plus 20 feet equals 2560.61 feet, plat record 2562.80 feet. I then measured along the last mentioned fence line and my distance between the centerline of Nob Hill and Elgarose Roads was 1659.56 feet, plat record 1678.4 feet. I then prorated the difference I found and prorated in the corners for Lot 22.

In checking the measurements between the old fences I found them to be basically correct, within 3 feet ±. I believe that a previous survey in Lots 11 and 23 may have been predicated on the centerline of Orchard Lane being 10 feet farther South as the County Road is now located.
