I ran a closed traverse in and around Section 29, T29S, R7W using a Jena I Second theodolite and a Mac IE EDM. I achieved a precision of 1:41,343 and adjusted the traverse by the Crandall method. I calculated & set the Center 1/4 Corner at a bearing intersection using a midpoint for the 1/4 Corner 29|28.
Howard W. Johnstone P.O. Box 1088 Roseburg, Oregon
