(BASIS OF BEARING---1882 G.L.D. SURVEY N89°31'E)

The purpose of this survey was to set the north one-quarter corner of Section 30, Township 31 South, Range 7 West, and to mark a portion of the property lines as shown with red painted blazes, and steel fence posts.

The control for this survey was the northwest section corner as previously renewed by the County Surveyor from original evidence, and the northeast section corner as renewed by the 1963 BLM Cadastral survey from original evidence. A diligent search was made for the north one-quarter corner, but no evidence was found and the area all around this corner has been logged.

The north one-quarter corner was set at the proportionate distance between the section corners.

The basis of bearing was the 1882 GLD survey of the same line.

This survey was performed in January and February, 2002, using Leica TC 805 to run a closed loop traverse.
