NARRATIVE

THE PURPOSE OF THIS SURVEY WAS TO SET THE NORTHEAST SECTION CORNER OF SECTION 8, TOWNSHIP 32 SOUTH, RANGE 4 WEST AND MARK PORTIONS OF THE NORTH AND EAST LINES OF THE SECTION. WE WERE UNABLE TO MONUMENT THE INTERSECTION OF THE NORTH AND EAST LINE, SO WE RENEWED THE CLOSING CORNER FROM THE ONLY REMAINING BEARING TREE TO THE SOUTH EAST, WHICH MATCHES WITH THE ROOTHOLE OF THE OTHER BEARING TREE TO THE SOUTHWEST.

THE CONTROL FOR THIS SURVEY INCLUDES THE CLOSING CORNER AS REESTABLISHED BY THIS SURVEY; THE EAST ONE-QUARTER CORNER OF SECTION 8 ONLY, AS ESTABLISHED BY LAURENCE, CS 40/174; THE WEST ONE-QUARTER CORNER OF SECTION 9 ONLY, AS RENEWED BY DEGROOT FROM ORIGINAL EVIDENCE; THE SOUTHEAST SECTION CORNER OF SECTION 5 AS RENEWED PREVIOUSLY FROM ORIGINAL EVIDENCE; THE NORTH ONE-QUARTER CORNER AS REESTABLISHED BY BRUCE SHANER, RM 1-37, BY SINGLE PROPORTIONATE METHODS; THE WEST ONE-SIXTEENTH BETWEEN SECTIONS 5 AND 8 AS ESTABLISHED BY DEGROOT IN 1990, M 111-12

THE BASIS OF BEARING IS BRUCE SHANER'S 1963 SURVEY OF THE LINE BETWEEN THE NORTH ONE-QUARTER CORNER OF SECTION 8, AND THE SOUTHEAST CORNER OF SECTION 5. THIS SURVEY WAS PERFORMED IN NOVEMBER & DECEMBER OF 2005, AND COMPLETED IN JANUARY OF 2006, USING A LEICA TC805 TO RUN CLOSED LOOP TRAVERSES.
